ABSTRACT

PURPOSE: To provide the automatic **vending machine** which makes it possible to know whether or not a **discount** is made at a glance and can issue a receipt.

CONSTITUTION: This automatic **vending machine** has a selection button 16 for **vending** a commodity, a batch purchase specification button 36 for **vending** a specific number of commodities at a time, a **discounting** means which reduces a sale **price** when the batch purchase specification button 36 is selected, an additional **vending** means which **vends** commodities by a batch purchase quantity plus one when the batch purchase specification button 36 is selected, a **discount** / additional selection button 38 for selecting **discount vending** using the **discounting** means or additional **vending** using the additional **vending** means, and a receipt issuing device 60 which issues the receipt into which the **discounted** amount of money by the **discounting** means is entered.
